VENNA SRI SOWMYA

Full Stack Developer
+91 9391946228 | vennasowmya009@gmail.com | Hyderabad, India
LinkedIn | GitHub

PROFESSIONAL SUMMARY

Early-career Full Stack Developer with hands-on experience in Python, FastAPI and REST APIs, supporting an enterprise healthcare Applicant Tracking System (PostgreSQL, SQLAlchemy, Redis, Celery). Skilled in JWT authentication, RBAC, debugging and testing, with experience building AI-enabled applications using OCR and machine learning.

TECHNICAL SKILLS

API Development: Python, FastAPI, REST APIs

Databases & ORM: PostgreSQL, SQLAlchemy, SQL, MySQL

Async Tasks & Caching: Celery, Redis

Security: JWT, RBAC, Multi-tenant access, pip-audit

AI Integration: Gemini API, Google Cloud Vision (OCR), Prompt Engineering

Testing & Debugging: Pytest, Debugging, Software Testing, Playwright (Fundamentals)

Version Control & CI: Git, GitLab, GitHub Actions

Programming Fundamentals: OOP, DSA, DBMS, SDLC

Frontend: React.js, HTML5, CSS3

AI Fundamentals: Machine Learning, Generative AI, LLM Fundamentals

Code Quality & Developer Tools: Flake8, API Testing, Troubleshooting, VS Code

PROFESSIONAL EXPERIENCE

Full Stack Developer | Nextenti Tech Private Limited

Hyderabad, India | Jun 2026 - Present

- Support and troubleshoot Python/FastAPI backend services for an enterprise healthcare Applicant Tracking System using PostgreSQL and SQLAlchemy.
- Resolve API, database, authentication and recruitment workflow failures across application services and data layers.
- Work with Redis and Celery for distributed background processing and diagnose asynchronous task failures.
- Collaborate through Git-based development workflows, working across frontend and backend layers to deliver fixes.
- Apply debugging, troubleshooting and software testing practices to keep recruitment workflows reliable.

Project Associate Analyst | APCRDA

Andhra Pradesh, India | Jun 2025 - May 2026

- Coordinated with engineers, consultants and stakeholders to support project execution, progress tracking, reporting and documentation workflows.
- Prepared reports and dashboards by organizing project information and supporting data-driven communication.
- Maintained project documentation and progress records to support cross-team visibility and delivery activities.

PROJECTS

ATS Healthcare Applicant Tracking System | Enterprise Application Contribution

Python | FastAPI | PostgreSQL | SQLAlchemy | Redis | Celery | JWT | RBAC

- Contributed to recruitment workflows spanning requisitions, candidates, applications, interviews, offers and preboarding.
- Developed and troubleshot REST APIs and relational data workflows; resolved issues across frontend and backend layers.
- Implemented and debugged JWT-based authorization, RBAC and multi-tenant application workflows to support secure access.
- Debugged asynchronous Redis/Celery processing and application failures using collaborative Git/GitHub workflows.
- Investigated issues across API, database and authentication layers to restore stable end-to-end recruitment workflows.

MedScript Clinical AI and Healthcare Workspace | AI Application Project

Python | Flask | PostgreSQL | SQLite | Scikit-learn | Gemini | Google Cloud Vision

- Built AI-assisted healthcare workflows combining clinical assistance, prescription processing, medicine workflows and doctor consultation features.
- Integrated prescription OCR using Google Cloud Vision and symptom-to-disease inference using Scikit-learn SVM and Random Forest models.
- Used the Gemini API for AI-assisted clinical features within the application.
- Developed modular backend services, REST APIs and database workflows using Python, Flask, PostgreSQL and SQLite.
- Added automated testing and security checks using Pytest, Flake8, Bandit and pip-audit.

CORE COMPETENCIES

- **Backend Development:** Designing, debugging and maintaining REST APIs and relational data workflows in Python (FastAPI, Flask).
- **Secure Application Access:** JWT-based authentication, role-based access control (RBAC) and multi-tenant workflows.
- **AI-Enabled Applications:** OCR, machine-learning classification and Gemini API integration in a healthcare context.
- **Quality & Reliability:** Pytest-based testing, static and dependency security scanning (Bandit, pip-audit), systematic troubleshooting.

EDUCATION

B.Tech. in Information Technology | Vijaya Institute of Technology, JNTUK

Andhra Pradesh, India | 2021 - 2025 | CGPA 8.21/10

- Core coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Software Development Life Cycle.

LEADERSHIP

Secretary | AIML Club | Vijaya Institute of Technology | 2022 - 2025

- Organized and supported workshops, hackathons and AI/ML awareness activities for students and technical communities.

CERTIFICATES

- Programming Essentials in Python - Great Learning
- Machine Learning with Python: A Practical Introduction
